TERMS OF SALE

1. Prices

Our prices are indicated in euros per meter (€ / m), without VAT and without transport. Discounts are made for purchase volume.

For all clients, transportation will always be included in the invoice, unless they send their agency to pick up.

2. Material departure times

The manufacturing and delivery times are approximates.

The advance payment does not imply that the products are sent the day the payment is made. This is understood as a firm confirmation of the order and it will follow the usual processes.

3. Shipping

The cost of transport is not included in the prices. If the transport is sent by our means, the cost will be included in the invoice.

The transit times of the agencies usually range between 1 - 3 days within the Peninsula and between 5 - 7 days for the Islands, depending on the destination.

For international transport consult in each case.

4. Products in stock

The materials in stock are usually in bars of 6 meters long and in white or natural color. At certain times, for manufacturing remains, there may be smaller bars or other colors. Consult in each case.

In general, the custom cut is not charged. However, the cuts caused by cutting the profiles in stock are the responsibility of the buyer.

For cuts of pieces below 200mm, the price will be increased by 10%.

5. Technical specifications

All the profiles of this price list can be made in any type of resin according to the buyer's requirements: orthophthalic, isophthalic, vinyl-epoxy or fire-retardant.

Likewise, all profiles are susceptible to be manufactured in any of the three types of fiber we work with: fiberglass, carbon fiber or basalt fiber.

For profiles with specific color properties, resins or others, a minimum order will be made. The quantities depend on each type of profile.

In addition, our materials can be manufactured with UV stabilizers at the request of the buyer.

6. Payment conditions

The first order will be paid in advance, as well as orders less than 300€. For subsequent orders, the payment conditions will be studied in each case as long as the order exceeds 300€.

In case of requesting a study of credit conditions, the client will be invoiced for the expenses derived from such a study, whether it is positive or not. The amount of the study amounts to 30€.

En ningún caso las condiciones de pago serán superiores a 60 días fecha de factura o 30 con día de pago, por medio de recibo domiciliado.

Deferrals of payment, as well as all delays in payments, will generate an invoice in postponement expenses or interest for late payment.

7. Minimum quantities

Certain products without stock need a minimum amount of order to be manufactured. The product and the necessary order quantity of the product are indicated in the price list to be able to carry out its manufacture.

Likewise, products that are not available in stock or pending manufacture will require a minimum quantity for their manufacture.
